SCANPORTAL WEB CAPTURE

by ScanPortal Technologies, Inc.

[Main](#) | [Quick Overview](#) | [Press Release](#) | [System Components](#) | [PortalDxi](#)

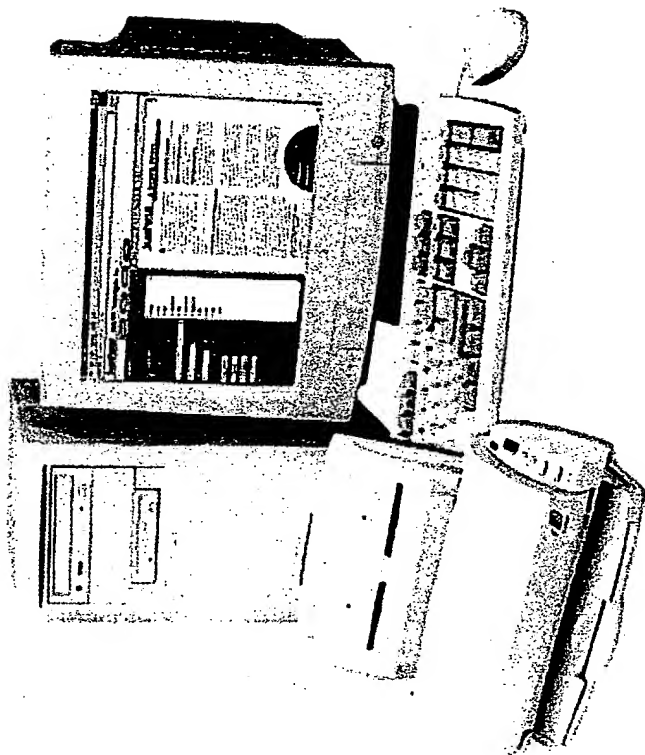

[ScanPortal](#) | [ScanPortal Web Capture](#) | [ScanPortal Web Capture A/P](#)

Introduction

ScanPortal Web Capture is an Internet-based content management system that will revolutionize the way your company works with both paper documents and electronic files!

ScanPortal Web Capture enables your Web browser to scan and process documents (when connected to a TWAIN compliant scanner), drag and drop files from any Internet-connected PC to Web document repositories and/or CD archives for secure 24/7 access.

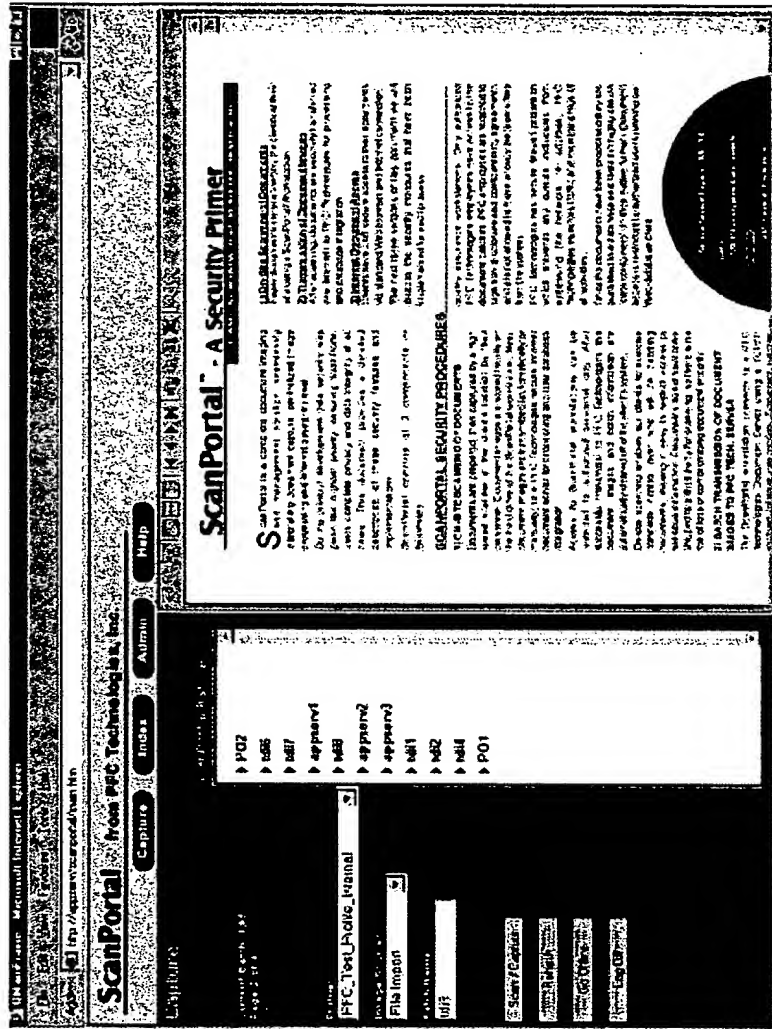

Protecting and Organizing All Business Information

Finally there is one integrated solution enabling companies of all sizes to digitize, organize, centralize and protect all their mission critical documents and files, including paper documents, electronic files, (e.g. MS Office files, word processing files, spread sheets, bitmap images, engineering drawings), fax, mainframe and other forms of data across your organization.

With ScanPortal Web Capture, companies have the option of storing their documents and files off-site at ScanPortal Technologies' highly secure document and data warehousing facility. Clients are provided instant document access to their data through a standard Web browser. Think of ScanPortal Web Capture as a safe deposit box for your valuable unstructured business data in the worst of times and a universal document management solution for your organization every day.

ScanPortal Web Capture Main Screen

No Up-Front Expense - Immediate Deployment

Scan Portal Web Capture requires NO capital outlays, NO servers to maintain, NO software to install and maintain, and NO drain on IT and human resources.

Implementation is immediate (within 24 hrs. is available). ScanPortal Web Capture clients needs only one or more TWAIN compatible scanner (s) hooked up to an Internet connected Windows PC and a standard Web Browser.

For a few pennies a page (much less than the cost of a photocopy), you and your employees can scan and index your important documents to a secure, personalized web-based document repository with unlimited 24/7 Internet access. Document and file

databases can even be archived to CD-ROMs and sent to your company for easy long-term storage and access.

Features/Benefits

- On-demand browser-based scanning
- No monthly scanning volume restrictions
- Works with any document scanner using TWAIN driver
- Documents stored in secure online document repository
- 24/7 Online Document Repository access
- CD ROM archiving available
- Optical Character Recognition (OCR) available to enable full text document searching
- Automated multi-page document separation using bar code separators
- Remote database administration. Quickly set up additional accounts, define user rights and create and assign access to scanning profiles
- No capital investments required in software and custom applications
- No drain on IT resources
- Scan from multiple locations to centralized document repository
- No downloads or application installation required
- Improves productivity
- User friendly. ScanPortal Web Capture is as easy to use as browsing the Internet
- Configurable document profiles
- On-screen indexing and data capture option
- No software upgrades to worry about. All software is maintained by ScanPortal Technologies.

Document Database Security

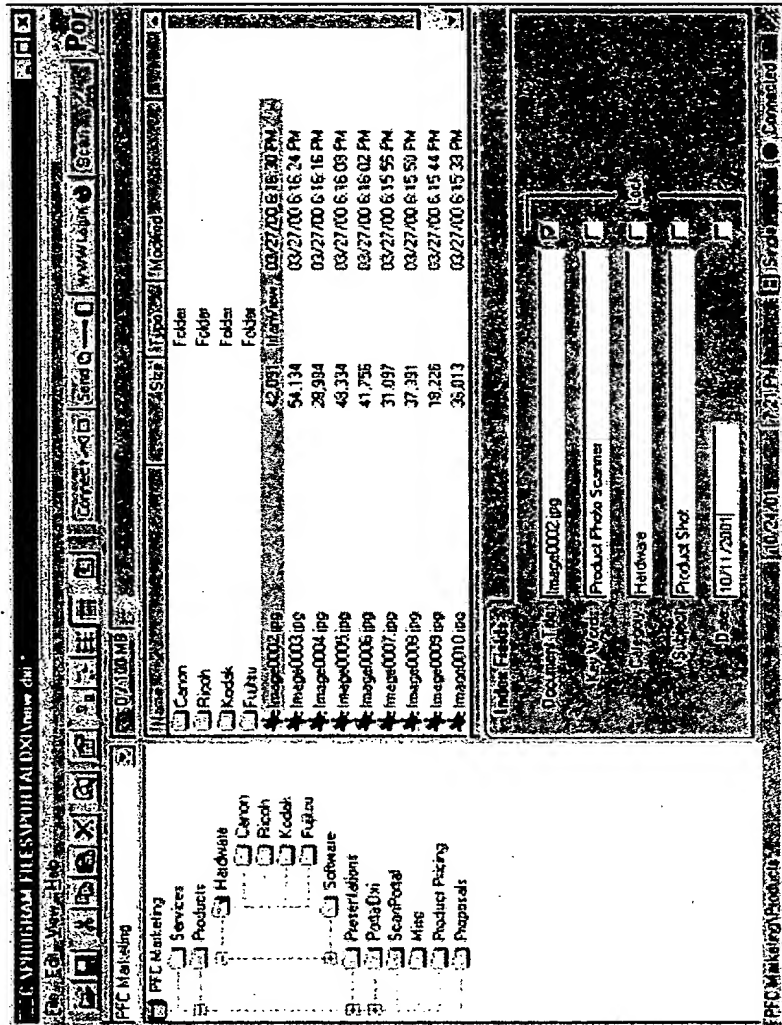

While contained in the on-line document repository, every conceivable measure is provided to ensure the safety, reliability and protection of the company's document database. ScanPortal servers are housed in a protected facility with the following safeguards:

- Temperature and moisture control
- Access management of data center

- Video surveillance
- Fire suppression
- Dual data connections with Global Crossing and AT&T via redundant fiber and microwave connections
- Redundant power supplies including a 85 KVa UPS and diesel power generator
- Daily database backup to tape

ScanPort Web Capture w/PortalDxi

When used with ScanPortal Technologies' powerful PortalDxi (Document Exchange Interface) desktop client, you can drag and drop any electronic file (including Microsoft Office files, digital photos, HTML pages, PDF files and e-mails) to your Web document repository. Files can be accessed wherever your work takes you - In the office, at home or on the road.

PortalDxl Document Exchange Interface

A Cost Saving Solution

The Internet-enabled technology featured by ScanPortal Web Capture makes it an ideal solution for many businesses, including payment processing centers, health care organizations, law firms and financial institutions. ScanPortal Web Capture is a cost-effective solution for companies with multiple branch offices or an otherwise "distributed workforce". Using ScanPortal Web Capture, a sales person in the field can have access to pertinent documents and files using nothing more than a laptop computer and a phone line.
